COGNAC | ARMAGNAC | CALVADOS

For the past three centuries, Cognac has been universally recognized as the finest of all the spirits that are distilled from grapes. It has many incomparable qualities: fruitiness, subtlety of bouquet, intensity, warmth and, above all, the complexity of the many thousands of styles and flavors from a (predominantly) single grape variety.

FACUNDO SELECTED RON SUPERIOR DE BACARDI	95

GRAPPA

Distilled from pomace - the leftover grape skins, seeds, stalks and pulp from the wine press - was invented by Italian farmers to extract the last drop of value from their grapes and potent enough to get the farmers through the cold winter months. It was good at warming you up. For generations, Italians have sipped this "firewater" after meals and even added a little to their morning espresso, (café corretto) to "correct" it. Grappa was originally made in Bassano del Grappa - were it gets its name - a small town of Italy's northern Veneto region.

AMARO

“Vi posso offrire un amaro?” Or, “Can I offer you an amaro?” is the single most reassuring phrase to be heard at the conclusion of a restaurant meal in Italy. Amaro (Italian for “bitter”) is an Italian herbal liqueur often originated in monasteries and pharmacies. Amaro is produced by macerating herbs, roots, flowers, bark, and/or citrus peels in alcohol, either neutral spirits or wine, mixing the filtrate with sugar syrup, and allowing the mixture to age in casks or bottles.

AMARI FLIGHT 25

Try a taste of any 3 Amari

GIN

Taken at its most basic, it’s just a spirit that’s flavored with juniper. But behind that simple facade lies one of the world’s most complex and best-loved spirits, with a history that spans hundreds of years and reaches back to the dawn of distillation.

VODKA

Vodka is much more interesting than it might appear to the casual observer. Scrape beneath the surface and you'll find a spirit with a rich and diverse history, made from a variety of raw materials, each of which affect the finished product's final taste, and sometimes flavored with a quite bewildering array of different fruits, herbs and spices from every corner of the globe.

IRISH WHISKEY

The Irish may have been the first distillers in the British Isles and, for a brief period in the 19th century, Irish whiskey reigned supreme over its Scottish rival. Boom was followed by bust - and near extinction - but today the good times are back, with distilleries popping up all over the Emerald Isle.

JAPANESE WHISKY

Japanese whiskey is far from new. When Masataka Taketsuru returned to Japan from Scotland in the early 1920s, having studied distilling, he, in essence, became responsible for the birth of Japanese whisky.

BLENDDED

Roughly nine out of 10 bottles of Scotch sold around the world are blends - that is, a mix of grain and single malt whiskies. These products are the lifeblood of the industry and the liquid expression of an art form that borders on alchemy: combining myriad components to create one harmonious and consistent whole.

TEQUILA

Tequila was first produced in the 16th century in the city of Tequila. A fermented beverage from the agave plant known as pulque was consumed in pre-Columbian central Mexico before European contact. When the Spanish conquistadors ran out of their own brandy, they began to distill agave to produce one of North America's first indigenous spirits.

MEZCAL

Mezcal the agave is cooked in conical pits dug into the ground. This process imbues a smoky aroma and flavor to the agave, which carries over to the mezcal, giving it a smoky quality that reminds some of peated single-malt Scotch.

HIGHLAND

By far the biggest region geographically, the Highland malts inevitably embrace wide and robust flavor variations. Generally heavier and drier in character compared to other regions, whiskies from here often have nutty, honey, heather or peaty notes. Distilleries near the sea also have some salty, maritime influences in their malts.

ISLAY

Pronounced "eye-luh", this is the greatest of whiskey-producing islands. It is only 25 miles long but has no fewer than eight distilleries. It's covered in peat which is exposed to rain and sea spray. Harvested and used to malt the barley used in distilling, the peat gives the single malts here their characteristic smoky flavor with some salty, seaweed notes.

LOWLAND

There are only a handful of Lowland distilleries still operating, producing softer, lighter style single malts that are traditionally known as the 'Lowland Ladies'.

AUCHENTOSHAN THREWOOD	28
-----------------------	----

RYE WHISKEY

Rye whiskey was the prevalent whiskey of the northeastern states, especially Pennsylvania and Maryland, but largely disappeared after Prohibition. Now in an era where strong flavors are back in style, rye is enjoying a new golden age. It has to have a mash content of at least 51% rye and, if aged for at least two years in new charred oak barrels, it earns the moniker 'straight rye'.

BOURBON | AMERICAN WHISKEY

American Bourbon is distilled once, then aged in fresh charred oak barrels. Bourbons impart a raw, sweet corn flavor due to the fact that bourbon is made with at least 51% corn. Small batch bourbons are made in limited quantities, aged six to nine years, and are characteristic of pre-Prohibition whiskey, with strong, rich flavors, heat, and aromas.

SCOTCH WHISKY

Die-hard aficionados swear that nothing is finer than a single malt with its characteristic regional flavors. Derived from malted barley Scotch is double-distilled and the malted barley is dried using peat smoke, imparting earthy, smoky, salty and oily characteristics, depending upon the region in which it is produced. Scotch is aged first in used bourbon barrels for at least three years. Older, rarer Scotches receive additional aging in madeira, port, or other casks. Scotland is split into five distinctive whiskey-producing regions. The same basic process is used to produce whiskey across the country but subtle variations mean single malts from each region have unique characteristics and flavors.
